SUMMARY

As a beginner developer, I have gained a solid foundation in full-stack web development using Laravel, as well as experience in developing a customer management system using C#. Additionally, I have also explored mobile app development with Flutter and have developed basic skills in this area. My technical abilities, combined with my eagerness to learn and grow, make me a valuable addition to any development team.

WORK EXPERIENCE

IT TECHNICIAN/WEB DEVELOPER
August, 2022 - Present

www.kantipurhealth.com , Bharatpur-12, Chitwan

I started with basic knowledge of web development, and it gave me a good experience on how it is to maintain a proper website instead of creating projects on my own.

ACADEMY

BSC.IT
December, 2022 - Present

ISMT College , Bharatpur

+2
September, 2020 - May, 2022

Ankuram Academy , Bharatpur

🚀 PROJECTS

My Notes app using flutter

A basic beginner app created to test my skills and knowledge beginning the mobile development learning.

Listing Website

A website created using laravel as my learning process and a basic template of listings and it's management

Customer management system for gym

A college project using C# with my consisting knowledge of designs and development. Despite a college project, it is a full-fledged software that can be used in any business for customer management. This project also helped to gain access to the desktop development and made me confident in development using C#

Beginner E-Commerce site

My first project to start in the field of development and I chose the harsh way to make an e-commerce website which landed me into the interest of software developement.
